2025 Course Outline

HBA PROGRAM: LEADING PEOPLE AND ORGANIZATIONS
BUSINESS 3311 Sections 3 & 4

Professor: Dr. Barnini Bhattacharyya	**Faculty Assistant (FA)**: Stephanie Baxley
Office: Ivey Room 2365	**Office:** Ivey Room 3350-7
E-mail: bbhattacharyya@ivey.ca	**Email:** sbaxley@ivey.ca

LAND ACKNOWLEDGEMENT

Western University is situated on the traditional lands of the Anishinaabek, Haudenosaunee, Lunaapewak, and Chonnonton Nations, who have long-standing relationships to the land and region of southwestern Ontario and the city of London. The local First Nations communities are the Chippewas of the Thames First Nation, the Oneida Nation of the Thames, and the Munsee Delaware Nation.

COURSE DESCRIPTION

Welcome to Leading People and Organizations! The major objectives of the course are to:

1. Develop an understanding of the important role both leaders and followers play in organizations.
2. Learn how to participate effectively in teams by gaining perspective on the factors that lead to effective and ineffective team behaviour, both in yourself and others.
3. Improve your leadership skills and followership skills by practicing key behaviours needed to manage people effectively.
4. Broaden your awareness of the impact of organizational culture and the importance of building and maintaining a positive organizational culture.

The course is divided into several parts.

1. *INTRODUCTION TO LEADERSHIP DEVELOPMENT:*
   We begin by discussing leadership broadly. What is leadership? What does it take to be a leader? How does a leader lead? How can we become better leaders? Throughout these discussions, we will also think about the related concept of followership. After all, a leader cannot lead without followers.
2. *LEADING TEAMS*:
   We then spend time exploring how to develop your team management skills and to provide deep insight into how and why people behave in certain ways in their teams with respect to their tasks, their team members, and their external contacts outside the team. This module deals with teams in complex contexts, team decision-making, team problem-solving, and team conflict and crisis.
3. *LEADING PEOPLE*:
   This module is designed to develop your personal people management skills and to provide great insight into how and why people interact in certain ways with their peers, subordinates and superiors. We provide concepts and exercises that build your skills for managing performance across a diverse

set of interpersonal relationships, task settings, social networks, and organizational levels.

4. *LEADING ORGANIZATIONAL CULTURE:*
   Our final module is designed to develop your understanding of the concept of organizational culture. We will discuss the determinants of organizational culture and its effects on employees and organizational performance.

LEARNING OUTCOMES

INTRODUCTION TO LEADERSHIP DEVELOPMENT:

At the end of this module, students will be able to…

- Identify attributes that might make a leader/follower effective
- Compare and contrast one's own and others' ideas about what makes a good or bad leader/follower
- Determine factors that affect leadership
- Reflect on their own leadership trajectory

LEADING TEAMS:

At the end of this module, students will be able to explain the Team Effectiveness Model and use it to…

- Structure a team
- Contribute to team effectiveness
- Diagnose team problems
- Intervene to improve team functioning

LEADING PEOPLE:

At the end of this module, students will be able to explain the Team Effectiveness Model and use it to…

- Evaluate the impact of leadership styles on people
- Diagnose employee performance problems
- Intervene to enhance employee performance
- Build constructive relationships at work with parties important to business and career success

LEADING ORGANIZATIONAL CULTURE:

At the end of this module, students will be able to explain the Star Model of organizational design and use it to…

- Evaluate the extent to which the organizational culture supports business goals
- Identify ways to improve the alignment of the organizational culture to support business goals
- Diagnose whether an organization's culture fits personal career goals

GRADING COMPONENT SCHEME

Student grades are expected to be assigned based on the following components:

Assignment Category	Due Date	% of Grade
Team Charter	Sept. 29	5%
Team Debrief Report	Nov. 14	10%
24-hour Team Challenge	Oct. 9 – Oct. 10	25%
Final Individual 4-Hour Exam	Dec.11	30%
Online and In-Class Contribution	Throughout the Semester	30%
Total		**100%**

Team Charter and Debrief Assignments

You will be assigned to a formal Learning Team this term and you will develop a Team Charter to help guide your interactions. Part way through the term, you will have an opportunity to reflect on the effectiveness of your Team Charter through a Debrief Report. More details will be available on the assignments page on LEARN.

24-hour Team Challenge

For the 24-hour team assignment, your team will be given a management case to analyze. The team will be expected to use concepts introduced in the course to date to address the case issue(s). The case will be given to you on October 3rd and your team submission must be uploaded to LEARN on October 4th (separate instructions will be provided at a later date). It is important that team members contribute their time, knowledge and skills fairly to the team submission. In cases where there is evidence that a team member has contributed significantly less than others in the group, the course instructor has the right to investigate and adjust the grades accordingly.

Final Exam

For the final exam you will be given a management case to analyze. The exam will be limited to four hours. All class material is potential content for this exam. The evaluation of your exam will be based mostly on the quality of your situation analysis of the assigned case, your recommendations for action and their connection to your analysis, and your effectiveness in communicating this information.

Class Contribution

Your participation in class will provide the basis for my judgment of your normal level of day-to-day preparation. I expect you to be fully engaged in the entire learning process and you should be prepared in each class to participate voluntarily and when called upon. This means devoting time and energy to preparation before class, listening to others during class discussions and engaging in class discussions. Collective reasoning and discovery are critical to the successful application of the case method. ***Prior to any case discussion, engaging in discussions with (or examining notes from) others who may have already experienced a case or activity is a clear violation of our norms***.

Your class contribution grade will be based on a number of things. A minimal amount of credit is given to simply showing up and **staying in your seat throughout the class session**, but the majority of credit is based on a daily assessment of your performance. ***While in-class contribution is essential, you can add to your contribution mark by completing the assigned pre-class preparation (including Perusall – see below) and any post-class assignments well and on-time***. Both the quantity and quality of your contributions will be assessed. If you have an absence excused by the program office, you will receive only the attendance credit, but not the performance portion of your contribution mark for that day.

No credit will be given for missed classes, although you might be asked to provide evidence of your preparation in writing. When calculating your contribution grade, the two lowest scores will be dropped.

Asking questions can make high quality contributions to class when they advance general understanding by stimulating an in-depth analysis of a point. Remember, the main objective of your contribution is not evaluation, but learning and helping your colleagues to learn. The following list might be of some help when thinking of in-class contributions:

Outstanding Contribution (90-100%)

- Contributes at the highest levels throughout the class;
- Contributions indicate thorough preparation;
- Contributions reflect careful attention to the ongoing discussion;
- Contributions include strong follow-up comments and questions;
- Helps integrate operations concepts with other subjects;
- Frequently explains difficult points or concepts;
- Provides sustained strong support to enrich classroom learning;
- Builds and develops outstanding arguments for a position.

Excellent Contribution (80-89%)

- Contributes frequently to discussions;
- Contributions indicate careful preparation;
- Contributions reflect attention to and consideration of the ongoing discussion;
- Explains difficult points and concepts;
- Helps guide class discussions;
- Regularly builds and develops strong arguments for a position.

Good Contribution (70-79%)

- Contributes fairly regularly to discussions, but primarily in the beginning of the class;
- Contributions indicate consistent preparation;
- Contributions reflect thoughtful responses to the ongoing discussions;
- Raises questions that help focus on difficult points or concepts;
- Occasionally builds reasonable arguments for a position.

Fair Contribution (60-69%)

- Contributes irregularly to class discussions;

- Gives occasional indication of preparation;
- Rarely builds on the ongoing discussion.

Poor Contribution (50-59%)

- Contributes rarely to discussions;
- Gives little indication of preparation and thought;
- Does not aid in providing a positive atmosphere for meaningful discussion.

Unsatisfactory Contribution (0-49%)

- Almost never contributes to discussions;
- Gives minimal indication of preparation or thought;
- Actively inhibits or impedes the course of class discussions;
- Misses a significant number of class sessions.

Negative Contribution

Contribution can be negative as well as positive. Negative contributions including a lack of preparation, tardiness, leaving during the class discussion for a non-emergency reason, distracting activities during class, lack of respect, negative comments or absence from class without notice, will also be taken into account when calculating your final contribution grade.

Perusall

To encourage group preparation and discussion, readings of many of the course materials will be conducted on the Perusall digital platform. On this platform you can both read the materials as well as collaboratively annotate the content in smaller groups to enhance your learning. This can only be done BEFORE class by the stated deadline.

30% of your contribution mark will come from this online work. Activities that contribute to this component of the contribution grade include making high quality comments and making high quality replies to other people's comments.

Due to issues with technology, we *strongly recommend* not leaving these items until the last minute. We will not accept emails requesting extra time due to internet access issues or other last-minute technology issues.

ADDITIONAL RELEVANT POLICIES/PRACTICES

Attendance Policy

Classroom presence is fundamental to your case learning experience at Ivey. Each student serves an important role in class discussion. This is why your presence – including attending class and participating in constructive discussion – is critical to your own and others' learning.

Case teaching utilizes multiple perspectives and voices to sift through information, analyze evidence, and then construct and advocate for a solution. The nature of the case method makes it impossible to replicate the learning process of the classroom, even for students with notes from others. Even on days

that you do not actively speak in classroom discussions, your classroom experience is a central part of your learning. Indeed, on graduation, students rarely reflect on the great point that they made one day; rather, they remember the thought-provoking comments of others.

While there are reasonable circumstances that may lead students to miss one or more classes during the semester, the expectation is that students should attend class if it does not threaten the health or safety of others.

If you miss too many class sessions, you may be barred from writing in the final exam or assessment in the course.

While we expect that Ivey students will strive for the highest possible standards in attendance, there are also minimum attendance standards in place at Ivey. We have established minimum standards because missing classes impacts your own and your peers' learning. Class discussion is collectively created and is a critical part of the learning. If you have not attended class, you will have missed important learning that cannot be recreated through self-study. Your proficiency with course knowledge may be called into question. You will also have deprived the class of your perspective.

Unless otherwise stated, all classes require students to attend at least 75% of the class periods in order to participate in final exams/assessments. In HBA1 courses, this means missing no more than 6 class periods out of 25. In HBA2 courses, this means missing no more than 5 class periods out of 20. This includes any anticipated and unanticipated absences.

It is your responsibility to report your absences on LEARN.

If you cannot attend class, you still have responsibilities. You should report your absence on LEARN before the missed class. Reporting absences serves two important objectives. It supports your attendance record, and more importantly, it communicates to your faculty member that you are unable to participate in your learning environment.

Please note that using the absence notification in LEARN generates an automated email to your faculty member, and in some instances, to your academic advisor.

Faculty usually record attendance at the beginning of their session. If you expect to arrive late, please let your faculty member know in advance. Should you arrive late unexpectedly, please let your faculty member know at the end of the session.

Expectations for participating in our learning environment:

Punctuality: Late arrival to class is distracting for faculty and students and detracts from our teaching and learning environment. Class times are posted well in advance and available through your course tiles on LEARN. Please plan ahead and know when your class is in session. Tardiness can negatively affect your contribution grade.

Technology in the classroom: In the first session of a course, each professor will establish guidelines and expectations for technology use in their course. Given the differences in course content, delivery and application, technology use will vary between courses. **In this class, laptops and phones are to be left out of the classroom (unless for accessibility).** Sometimes you may observe differences in how your classmates engage with, or access technology in the classroom, from how you may access or use technology. This is because at Ivey, we understand that to have open and accessible classroom spaces, we may need to proactively accommodate students diverse learning needs through access to technology. Accommodations for learning differences support equity in our learning environments, so that students can engage, make sense of and contribute in our classroom spaces. For students who require access to learning accommodations related to technology use, please contact Western's Accessible Education team (http://academicsupport.uwo.ca/accessible_education/index.html).

Respect for our academic community: Please note that video or audio recording of classes, guest presentations, events, and other academic activities is strictly prohibited without express written permission of faculty or the Program Services office (for instances outside of your course). Except in emergencies, please refrain from leaving a class discussion before the end of the session. People coming and going from the class can distract students and the instructor.

Health, Wellness, and Support Services

As part of a successful student experience at Western, I encourage students to make their health and wellness a priority. Western provides several on-campus and virtual health-related services to help you achieve optimum health and engage in healthy living while pursuing your degree.

Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable speaking to, such as a trusted faculty member, academic counsellors within the HBA Program Services staff team, or via an email to studentsupport@ivey.ca.

Students who are in emotional and/or mental health distress should also refer to Health and Wellness resources at www.uwo.ca/health and through www.ivey.ca/support

Equity, Diversity and Inclusion

The Ivey community welcomes individuals of different ages, socio-economic backgrounds, non-discriminatory perspectives, ethnicities, genders, gender identities, gender expressions, national origins, indigeneity, religious and spiritual beliefs, sexual orientations, ability, and other visible and nonvisible differences. We consider our community, in-person and virtual, to be a place where all individuals, whatever their differences, are valued and will be treated with respect.

ACADEMIC OFFENSES

Scholastic offenses are taken seriously and students are expected to read the appropriate policies at: https://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_undergrad.pdf

CODE OF CONDUCT POLICIES

- Western Code of Student Conduct: http://www.uwo.ca/univsec/pdf/board/code.pdf

- Ivey Student Code of Professional Conduct located in the Student Handbook.
- Western Non-Discrimination/Harassment Policy: https://www.uwo.ca/univsec/pdf/policies_procedures/section1/mapp135.pdf
- The Code of Behavior for Use of Computer Resources and Corporate Data: https://www.uwo.ca/univsec/pdf/policies_procedures/section1/mapp113.pdf

PROHIBITED INFORMATION: Unless explicit instructions are received from your instructor to the contrary, your preparation must be limited to the information provided by your instructor(s), plus your own experience and that of your class peers. Class contributions should be based exclusively on your preparation and discussions with classmates, and not augmented with information obtained anywhere else. Information related to cases that have been obtained from sources other than your instructor in paper, electronic or verbal form is not permitted to be used for class contribution purposes. Such prohibited information includes, but is not limited to, the following:

- Hand-outs, including follow-on ("B") cases
- Exam or report feedback (related to a particular case) for other students or provided in other sections or years
- Notes, spreadsheets, etc. specific to cases (obtained before the case has been taught) prepared by students in other sections or years
- Company information that is not provided in the case (and that is not derived from your own experience)
- Teaching notes

If it is determined that such prohibited information is used in class discussions, such an incident will be deemed to be a violation of Ivey's Student Code of Professional Conduct.

PLAGIARISM

Students must write their essays and assignments (at Ivey this includes case exams and reports) in their own words. Whenever students take an idea, or a passage from another author or platform, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence.

All required papers (at Ivey this includes case exams and reports) may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between Western University and Turnitin.com (www.turnitin.com).

Notes on Use of AI or Other Technology Assistance

Our goal is to cultivate your judgment and wisdom in decision-making and ability to apply knowledge to practical situations. Using generative AI tools can be beneficial for your learning, providing synthesis of vast amounts of information, of helping explore new ideas, and analyzing data efficiently. However, over-reliance on AI, substituting it for your own critical thinking and cognitive effort, will hinder your ability to develop analytical skills, interpret and evaluate the quality of analyses, regardless of whether that analysis is human- or AI-generated.

Our expectations are designed to foster good practices that effectively integrate available tools without being replaced by them, ensuring you develop the essential judgment needed in an increasingly complex world. To be business leaders in the future, we expect that you will use tools available to you in an ethical and thoughtful manner.

To this end, we have the following expectations:

Preparation

1. You should read cases and develop answers to assignment questions without the use of AI. This effort will help you develop analytical abilities that are critical to effective decision making. Following individual preparation, you may engage in learning teams discussions to further your understanding and analysis of the material. Your instructor may also recommend AI tools to further augment your preparation.
2. You should respect the intellectual property rights of copyright holders and not upload copyrighted material without permission to any site.

In-Class

3. In general, use of technology devices in class is not allowed. Some courses may allow the use of technology for specific activities. Using technology when not allowed will negatively affect your contribution grade.
4. Using AI tools in a class session is expressly prohibited and an academic integrity violation as part of the class contribution requirement. An instructor may make an explicit exception to this rule.

Written Work

5. For submitted written work, be clear to acknowledge AI usage explicitly. For simplicity, we consider AI tools to be an external expert who has been consulted by you. In most citation methods, this citation is done as a personal communication or as a footnote at the start of the work that explains the usage.
6. You are welcome to use AI tools for background research. However, the final product should represent your own synthesis of the ideas and must be written in your own words. In a group assignment, the group is collectively responsible for the submission. You are responsible for any plagiarism.

OFFICE HOURS/APPOINTMENTS

If you would like to chat about this course or something else, please contact me to set up an appointment. Office hours are a good place to discuss concerns or simply to get to know each other better.
I would love the opportunity to talk to you one-on-one.
